Raymond Gamiao.

AI Automation and Web Developer

I help small businesses and lean teams stop doing repetitive work by hand. I build AI automations, dashboards, and web apps that sort incoming requests, pull data out of documents, and turn raw numbers into reports people actually read. By day I am a Senior Software Engineer leading a data and analytics team, so I am used to working with non technical stakeholders, clear handoffs, and systems that keep running after launch.

WHAT I CAN DO FOR YOUR BUSINESS

Automate repetitive admin
Emails and attachments get read, sorted, and turned into spreadsheet rows.

Reporting and dashboards
Live dashboards with plain language summaries of what changed and why.

AI assistants and triage
Requests get classified, routed, and paired with a drafted first reply.

Websites and web apps
Fast sites and internal tools, built, deployed, and maintained.

EXPERIENCE

Qstrike Innovations Phils OPC
Nov 2022 to present

Formerly QuickStrike Manufacturing Phils Inc.

Senior Software Engineer and Officer in Charge, Data and Analytics — Oct 2025 to present

- Lead a five person engineering team across an internal AI platform, company analytics, and production support.
- Designed and built an AI system that sorts and investigates incoming support tickets. In its first three weeks, manual routing dropped 68% and tickets got a written brief in a median of three hours.
- Oversee an internal AI platform where staff run AI agents connected to company tools and a shared knowledge base, reporting progress directly to US executives.
- Automated release and team workflows with GitHub, Jira, and Slack, and still fix production issues hands on.

Software Engineer — Jan 2024 to Sep 2025

- Fixed production issues on the company's online uniform customizer, shipped features end to end, and mentored junior developers.

Associate Software Engineer — Nov 2022 to Dec 2023

- Founding member of the Data and Analytics team. Built the first analytics dashboard, now the company's multi brand reporting platform.

Freelance Web Developer and Designer
2020 to present

- Build and maintain WordPress sites and design graphics for small businesses, working directly with owners from scoping to ongoing support.
- Took on graphic design, online research, and data entry projects for clients.

Earlier career
2017 to 2021

- Graphic artist, photographer, and LED wall technician at Photocity, Olrak Lights and Sounds, and J-EMS Printing Services. Client facing work on tight event deadlines across Northern Luzon.
